will be having an
After Holiday**

**OPEN HOUSE
January 7th
10:30-12:30**

**We invite all of you to
stop by and meet our
caregiving team!**

Who is ECC?

Elder Care Consulting, LLC is a professional geriatric care management company. Our company is owned and managed by an Advanced Practice Geriatric Nurse with over 20 years experience developing systems of care for seniors.

Happy Birthday Boomers!

Although much media attention has recently focused on the growing number of Baby Boomers, we at Elder Care Consulting want to take the opportunity to personally wish all of the Baby Boomers in our community a very happy birthday!

“Baby Boomers” is the term used to describe the 78 million Americans who were born between 1946 and 1964. Thus, January 1, 2011 marks the date that the first Baby Boomers will begin to reach the age of 65. Impressively, Baby Boomers in America will turn 65 at a rate of one every ten seconds (which is about 3 million to 4 million Baby Boomers per year). Compared with other generations, as the Baby Boomers age, the proportion of elderly citizens in the overall population will increase.

Many believe that the generation of the Baby Boomers is one of the most memorable generations in United States history, in large part because Baby Boomers made a considerable impact on the country and even the world. The Baby Boomer generation fought for civil rights and it is also the generation that sought equal opportunities for all citizens regardless of belief, gender, race and age. Baby Boomers also have played a significant role in politics. Thus far, there have been three Baby Boomer presidents: Bill Clinton, George W. Bush, and currently Barack Obama.

Baby Boomers embody many admirable characteristics that some people consider to be lacking in later generations. Baby Boomers often are described as generous, giving, and practical. In a USA TODAY/Gallup Poll of 1,011 adults

conducted in November, those surveyed believed that Baby Boomers were the most productive and socially conscious of any generation, either past or more recent.

As we enter the New Year and prepare to celebrate the 65th birthdays of the first Baby Boomers, it is important to remember their accomplishments, celebrate their admirable qualities, and look toward the future. Although many Baby Boomers will be entering retirement at an economically precarious time, advancements in medical technology have created a much more stable outlook for their health. Because many Baby Boomers enjoy healthier lifestyles

than preceding generations, it is expected that they will live longer, which will create implications for the health care system. Just as Baby Boomers have driven market change throughout their lifetime, the health care industry will now have to prepare to cater to the changing needs of this generation. Elder Care Consulting hopes to anticipate the needs of the generation and to adapt to help them age successfully.

Happy Birthday to those Baby Boomers turning sixty-five this year, and Happy Holidays to all from Elder Care Consulting!

Our vision is to assist seniors to function at the highest level of their abilities, support independence and improve health despite chronic disease or memory impairment.
